

STERISETS PRE-FILLED SALINE SYRINGES

Increase your efficiency

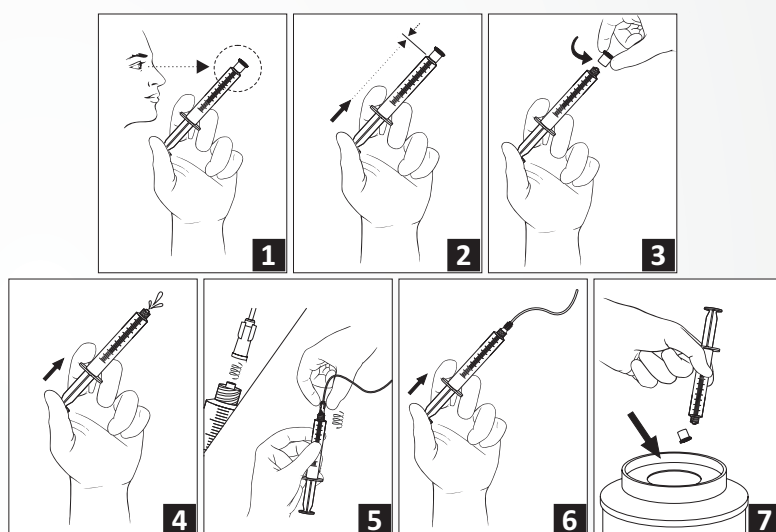

STERISETS® PRE-FILLED SALINE SYRINGES

- :: Easy to use.
- :: Clear description on the syringes.
- :: S = sterile inside and outside, to be used in a sterile field.
- :: SNS = sterile inside, non sterile outside.
- :: Barcode printed.
- :: Anti reflux.

STERISETS is well known in the medical device industry. With the experience of manufacturing pre-filled syringes for many years, Sterisets has developed a new production line for the pre-filled syringes. The whole process is performed in a cleanroom ISO 5 environment and is fully automated. All the syringes are terminally sterilized for safe usage.

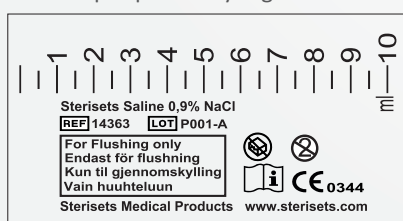

COLOUR CODED CAPS AND LABELS

The colour of the closure caps and labels indicates the saline volume, helping to easily identify each size. Safe colour coded closure caps and labels :

Sterisets® saline 0,9% NaCl
pre-printed syringe label

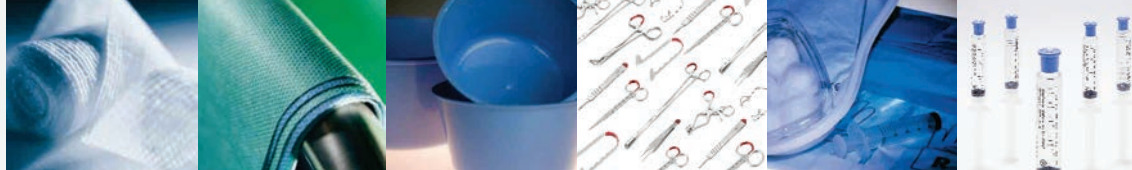

Bar coding EAN 13 on pouch

Bar coding EAN 128 on boxes

PRE-FILLED SALINE SYRINGES PROCESS

All the pre-filled saline syringes are easy to use, anti reflux, have clear labels and are barcode printed. They go through four steps ... Filling, Labelling, Packing and Sterilizing. The whole process is done in a cleanroom ISO 5 environment and is fully automated.

1 - FILLING

2 - LABELLING

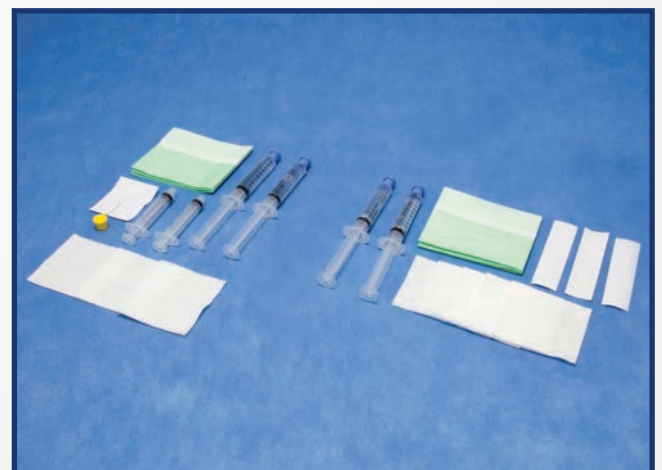

3 - PACKING

4 - STERILIZATION

DID YOU KNOW?

Sterisets is now producing complete sets, where the pre-filled saline syringes are inserted in the pack to save even more time and money. Some examples of procedure sets: catheterization sets, dialysis on/off sets, hemodialysis sets, etc.
